

Bar graph showing Relative Luciferase Activity (RLU) for GAL4-LXR α and No Receptor conditions. The GAL4-LXR α condition shows a 6x increase in RLU compared to the No Receptor condition. Error bars represent standard deviation.

| Condition | RLU (approx.) |
|---------------------------|---------------|
| GAL4-LXR α Extract | 120 |
| GAL4-LXR α ETOH | 20 |
| No Receptor Extract | 40 |
| No Receptor ETOH | 20 |
